Re: Alison Claire
DOB: 53 years old
Address: 11 Main Street
Preston 6125

Dear doctor,

Thank you for seeing this lovely 53 y.o. patient who has a background history of type 2 diabetes, hypertension. She is currently on metformin and gliclazide and ramipril. She has been referred to you because she has an infected right foot ulcer for the past 2 weeks after an injury from a thorn. She was given amoxicillin and then changed to flucloxacillin. Despite that, she continues to have an infection on her foot. I feel she will likely require more aggressive treatment given the failure of the oral antibiotics. Examination shows a non toxic patient but with a persistent fever of 38.4 and elevated pulse of 110. There is an obviously infected right foot ulcer. Many thanks for looking after her. Let me know if you need any further information.

Warm regards

Dr Kane
